

## BSI Label Set

An example of a full BSI label set can be found below.

Each of the BSI labels below includes a 2D barcode, the BSI ID and the associated material type. This example begins with 3 blank labels, followed by two Form labels (both with sequence numbers 000), three Tissue labels (with sequence numbers 001-003), two Packed Cells labels (with sequence numbers 004-005), ten Plasma labels (with sequence numbers 006-015), ten Serum labels (with sequence numbers 016-025), and ten Urine labels (with sequence numbers 026-035).
